PROFESSIONAL SUMMARY

Full Stack Web Developer with a B.Tech in Computer Science and Engineering (2026). Built two full stack projects using JavaScript, Node.js, Express.js and MongoDB (React in one of them), covering JWT authentication, role-based access control, file uploads and Razorpay payments. Looking for an entry-level Software Developer role where I can contribute to production code and learn from an experienced team.

TECHNICAL SKILLS

Frontend: HTML, CSS, JavaScript, React.js ,TypeScript

Backend: Node.js, Express.js, REST APIs, MongoDB, SQL

Tools: Git & GitHub, Postman

Core CS: C++, Data Structures & Algorithms, OOP

PROJECTS

FinTrack — AI-Powered Personal Expense Tracker

Tech Stack: HTML, CSS, JavaScript, TypeScript, Tailwind CSS, Node.js, Express.js, MongoDB, JWT, Google Gemini API, Razorpay

- Built an AI-powered financial assistant (Google Gemini API) that analyzes each user's expense data to generate personalized spending insights and actionable recommendations.
- Developed a full-stack expense tracking application with secure JWT-based user authentication and bcrypt password hashing.
- Designed and built REST APIs supporting full CRUD operations for expense management, including pagination for large datasets.
- Integrated Razorpay Payment Gateway to enable a premium membership tier with secure transaction handling.
- Secured protected API routes with JWT middleware so each user can access only their own expense records and insights.
- Built a responsive frontend with HTML, CSS, and JavaScript for adding, editing, and tracking expenses and viewing AI-generated insights.
- Used MongoDB for persistent data storage and validated all API endpoints using Postman.

Complaint Management Portal — Role-Based Complaint Tracking System

Tech Stack: HTML, CSS, JavaScript, TypeScript, Tailwind CSS, Node.js, Express.js, MongoDB, JWT, Cloudinary, Multer

- Built a full-stack complaint management portal with JWT-based authentication and role-based access control (RBAC) for Admin and User roles.
- Designed and developed REST APIs to support complaint creation, status tracking, and resolution workflows with secure, role-restricted endpoints.
- Implemented photo upload for complaints using Multer for file handling and Cloudinary for cloud-based image storage and delivery.
- Implemented an admin panel enabling administrators to view, filter, assign, and update the status of submitted complaints across users.
- Developed a user-facing dashboard for complaint submission and real-time status tracking, improving transparency and response visibility.
- Used MongoDB for persistent storage of complaints and user data, and validated all API endpoints using Postman.

EDUCATION

Bachelor of Technology (B.Tech), Computer Science and Engineering

JCDMCOE College of Engineering, Chaudhary Devi Lal University, Sirsa, Haryana | 2022 – 2026

Higher Secondary (Class XII), CBSE

Guru Nanak Public School | 2022

Secondary (Class X), CBSE

Govt. Boys Sr. Sec. School, GT Road, Shahdara | 2020
